Our story

The foundations of our company's success story were laid at the end of 2017 on a small warehouse floor. In the early days of our establishment, the scarcity of supply points that could produce, our problems in product supply and the financial difficulties we were in made us a company that could only sell online. Our belief in ourselves and our love for our work were the most important factors in overcoming difficulties one by one. Thanks to the strength we derive from this belief and love, we have constantly reinvented ourselves, constantly asking the question of how we can bring our company to the levels it deserves, and searched for new ones. While we, so to speak, are so wrapped up in our work; The nice comments from our customers and the increasing order requests made us happy and excited, but also burdened us with responsibility. The fact that the demands reached unimaginable levels in such a short time created a feeling of not being embarrassed towards our customers, who made us feel their love and trust. In order not to fall into this embarrassing situation, we promised to increase our efforts and grow ourselves. And one year passed since the day we were founded; We decided to open a workshop in Mersin where we could produce our own models, 2 months later we opened our workshop. With the happiness of meeting the demands and requests of our customers, we had created visions and missions to develop our company. We started to create trendy models suitable for the season and create catalogs of these models. Thanks to our wide-range product portfolio and active supply pool, we managed to become the most preferred women's hijab brand shortly after opening our workshop. Now the ALMILA TESETTUR brand was crossing the borders of the country. Our UK order, our first export demand, was actually the clearest indication that our targets were achieved one by one. These achievements were increasing our enthusiasm for work and our commitment to our work day by day. The interest we received from Europe, the Gulf Countries and the Middle East countries, and the intensifying demands forced us to expand and enlarge our production line. This challenge was a very sweet and happy challenge for us. By taking a radical decision to expand and enlarge our production power, which is the most fundamental factor that brings our company to these loves, We decided to open a factory in Mersin, and we put this decision into action in a short period of 3 months. In this production house; Being aware of the fact that our model shop where we draw, mold and model, our improving department where we train personnel, our sewing shop with more than 150 machines add strength to our strength, We will continue to unconditionally respond to the demands and requests of our customers in the best way possible. As the ALMILA TESETTUR brand, in terms of the situation we have come to; With our production facility in Mersin, With our model shop in Mersin, Serving all cities of Turkey Able to export to over 25 countries With our tens of online stores that are currently active, We will continue to do our job with passion and love, without compromising our basic principles...
